Common Response Type Model: MessageModel

It encapsulates status and message information where:

1. **status**: An integer property that holds a numerical code representing the status of the message.

2. **message**: A string property that contains a human-readable message associated with the status code.

API: AccountManagement/LockUnlockUser

Request:

```json
{
    "userName": "microware",
    "uLock": false
}
```

Response:

```json
{
    "status": 1,
    "message": "User unlocked successfully."
}
```
